

Task #	21-10	Date:	1 st July	Review Date:	Sept 21	
	Meet:	Barrowcliffe Close				
	Summary:					
	<ul style="list-style-type: none"> • Rookery Close to railway bridge, • Strancliffe Hall/HP School 					
	Volunteers:	8				
	Time:	10:00	12:00			
Weather:	Warm					

Another warm day today and again lots to do, so it was great to have so many keen volunteers. Andy even arrived before me! Today's challenge was to fill 4 brown bins with bramble, nettles and anything else that's spiky!

Working from the railway bridge back towards The Rookery, the team made steady progress clearing the path; removing the bramble that seems to grow a foot overnight but leaving as much of the flowering sedum as possible.

Gradually we made our way around the corner and back along the footpath towards Cotes Road. Clearing some of the overhead ivy as well as low level weeds.

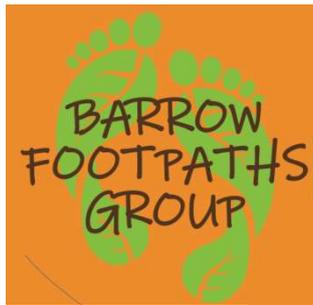

Rather than call it a day, we headed for Humphrey Perkins school and the footpath alongside Strancliffe Hall.

This narrow path along the playing fields, used by dog walkers and children alike, was full of nettles and ivy which almost swapped the path completely.

We've cut back as much as possible whilst also leaving some nettle growth for the wildlife to enjoy.

Next Task:
Thursday 8th July
Location: Hunting Lodge

Thanks to Andy, Bob, Margaret, Steve, Pat, Linda and Julie.

Thanks to Charnwood Borough Council for the brown bins
