

**Location:** I21 - Church Street to New St & I22 Melton Road - Highfields

**Task #** 16

**Date:** 12<sup>th</sup> June 19      **Review Date:**

Jitty between New St and Highfields before and after the task. Weeds and leaf debris removed and some of the nettles cut back. We left enough nettles for the caterpillars to enjoy, while trying to reduce the risk of getting stung when walking past.

Area between the garages and power substation before and after the task.

2 car batteries were removed, as well as large bag of rubbish (bottles, cans, etc) and various bits of metal and heavy duty black piping.

We tidied up the green waste already in this area into a new pile that can now decompose a little easier. We also carefully relocated a frog we found amongst the rubble and batteries into the new green pile.

Footpath alongside Hall Orchard School.

We cleared away the leaf debris and tidied ivy from the bottom of the edges all along this footpath.

Footpath between New St and Melton Road after we cleared away weeds and leaf debris along the gutters and wall.
